

## App-Design [CMSI24 – 3. Semester]

**Group:** Victoria Bremer, Selina Allerstorfer

**Topic:** Friendship Club App

**App description:** The goal of this app is to help friendship groups to organize and manage their shared free time activities. Those free time activities are gathered into so-called "clubs" e.g. running club, craft club, dinner club etc.

The app has three main tabs:

\* *Dashboard*:

It shows upcoming events, reminders, and important notifications such as new invitations, club updates, or last-minute changes.

\* *Calendar*:

Clear, visual overview of all planned activities across clubs. To stay more organized the clubs are color-coded.

\* *Clubs*

In the "Clubs" tab a user can manage all the joined clubs or create a new club. Each club has its own space with all the members, events, possibility to make polls to find a date. (Nice to have: photo gallery).
